

## Job Title: Building Services Engineer

### Responsibilities:

- Produce Building Services / E&M drawings, technical documents, method statements, and statutory submissions in accordance with project requirements and government standards.
- Attend and actively participate in Building Services technical meetings, including meetings with the client, consultants, and relevant authorities.
- Liaise and coordinate with sub-contractors, utility companies, and other project stakeholders to identify, resolve, and expedite design, interface, and site coordination issues.
- Ensure Building Services works are carried out in compliance with contract specifications, drawings, statutory requirements.

### Requirements:

- Bachelor's degree or above in Building Services Engineering, Electrical & Mechanical Engineering, or a related discipline.
- Minimum 5 years of relevant post-qualification experience with Main Contractors or E&M Contractors.
- Hands-on experience in MVAC is preferred.
- Proven experience in government works and/or projects.
- Proficient in AutoCAD and MS Office applications.
- Candidates with more experience will be considered for appointment as Building Services Manager.
- Immediate availability or short notice is preferred.
