PROJECT HIGHLIGHTS

BPS Designed & Built HK's First Automatic Dispensing System Project for a Healthcare Institution

BPS is currently delivering Hong Kong's first Automatic Dispensing System project for a public specialist outpatient clinic. To mark the occasion, our team held a traditional worship ceremony to pray for the smooth progress of the construction. As the solution provider, BPS is handling both system design and construction, marking an important milestone for local healthcare automation and smart infrastructure.

Lift Tower Construction Project for TWGHs Wong See Sum Primary School Nears Completion

The lift tower construction project for TWGHs Wong See Sum Primary School, undertaken by BPS Global Group, is entering its final stages. The project includes building a new lift tower and lobbies, as well as diverting and reinstating drainage pipelines.

Upon completion, the new facilities will vastly improve on-campus mobility, allowing staff to travel quickly between floors and transport goods with significantly reduced time and labour.

BPS Joined Hands with BTKCHC & BGCA for a Bowling Day

The BPS Global Charity Foundation, in collaboration with Buddhist Tai Kwong Chi Hong College (BTKCHC) and The Boys' & Girls' Clubs Association of Hong Kong (BGCA), organised a Corporate Volunteer Bowling Event. By connecting corporate volunteers, students and social workers through sports, the event brought a joyful and interactive experience to youth and individuals with special educational needs (SEN).

Warehouse Automation Explained: From Conveyors to Robots What Hong Kong Logistics Can't Afford to Ignore

Handling 10,000 orders in a traditional warehouse may require 50 workers pulling overnight shifts. In contrast, a warehouse automation system can complete the same workload with just over a dozen staff — within regular office hours. The difference isn't manpower; it's warehouse automation.

Pallet Shuttle System | High-Density Storage Solutions

The Pallet Shuttle System is one of the core solutions for achieving highly efficient pallet handling in modern warehouse management. By utilising automated machinery running on racking rails, it drastically reduces the need for manual operations and forklift entry into storage aisles. We provide one-stop shuttle system planning, installation, and maintenance services, helping enterprises maximise storage density and operational efficiency while saving valuable space and labour costs.
